

Remote Condition Monitoring

*The future of proactive care!
It. Simply. Works.*

- ✓ **Elevate Patient Health Outcomes**
- ✓ **Improve Practice Efficiencies**
- ✓ **Explore New Revenue Streams**

- **Elevate Patient Health Outcomes**

- Comprehensive suite of remote monitoring tools
- Empower patients and physicians

- **Optimize Care Quality Delivery**

- Dedicated care managers and clinical escalation team
- State-of-the-art equipment and predictive analytics

- **Explore New Revenue Streams**

- Billable physician services
- Services administered by an expert team

What Sets Us Apart:

- Enhanced comprehensive proactive care solutions
- SIM-Enabled devices (No Wi-Fi Needed)
- End to end infrastructure in place

Transforming Care Delivery and Improving Patient Outcomes Through Innovation

Streamlined Patient-Friendly Remote Monitoring and Chronic Care Management

Automatic Data Capture

No need for patients to manually input vital sign data.

Seamless Data Transmission:

Vital signs are easily and automatically sent to secure platform in real-time with access for patients' physicians.

Alerts and Notifications for Effective Escalation Management

Visibility into out-of-range readings or missed prescriptions.
Dedicated team is on standby to manage and respond to these alerts promptly.

Simplicity in Setup

Our user-friendly Cellular Gateway eliminates setup complexities.

Patient-Centered Approach

Empowering both patients and their physicians through user-friendly tools, enabling a shift toward a preventive and proactive care approach, ultimately aiming for a healthier population.

Revolutionizing Your Practice

Our innovative approach to healthcare technology is a value add; transforming patient care and providing peace of mind while bringing state of the art resources to your practice.

What to expect...

Improved Patients' Health Outcomes

- More frequent observation of patient data allows for quick response to changes. Examples of potential benefits include:
 - Systolic Blood Pressure reduction
 - Diastolic Blood Pressure reduction
 - Reduced risk of progression to ESRD and hemodialysis

Reduced Hospitalizations & Increased Office Visits

- A Dedicated Care Team Specializes in:
 - Chronic Care Management
 - Remote Monitoring
 - Behavioral Health Integration
- Closely monitoring changes in patients health status allows physicians to proactively manage care by increasing office visits when necessary, potentially avoiding hospitalization

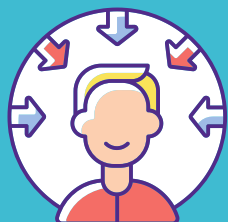

Enhanced Tools at Your Disposal

- Physician portal, patient portal and direct EMR data feed
- Dedicated care team involved in escalation processes
 - Monitors patient data, intervenes, and communicates with doctors
 - Facilitates appointment scheduling

Easy & Patient-Centric Experience

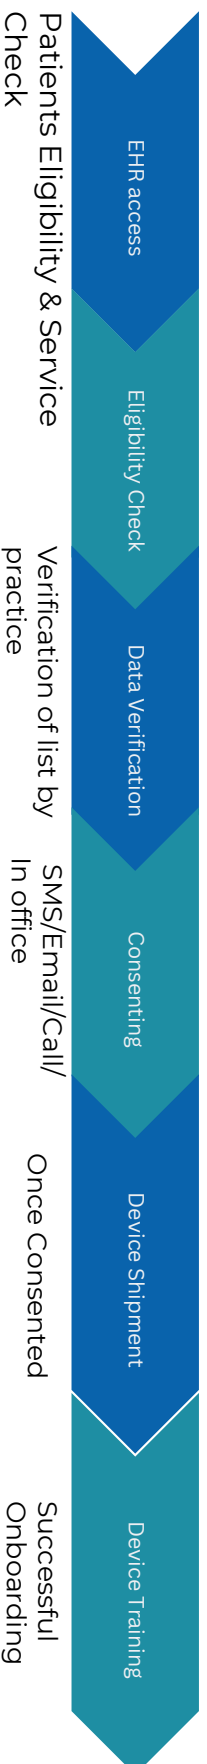

- Plug-and-Play: A simple cellular gateway requires no complex setup and no WIFI required
- Devices are sim card enabled and will work internationally
- No manual data entry by patients
- Automatic data capture and transmission to secure platform in real-time.

Onboarding Process*

Approximately 4 week process from signing to monitoring

In case of escalation

EFFICIENT ESCALATION PROCESS**

In case of no need for escalation

**BAA will be signed if not already in place. A participation agreement will be shared for physician's review and signature during the onboarding process.
